ECOCOMFORT PLUS

THE SIMPLEST DECENTRALIZED HEAT RECOVERY UNIT

Find out more

NEW REMOTE CONTROL AND NEW FEATURES

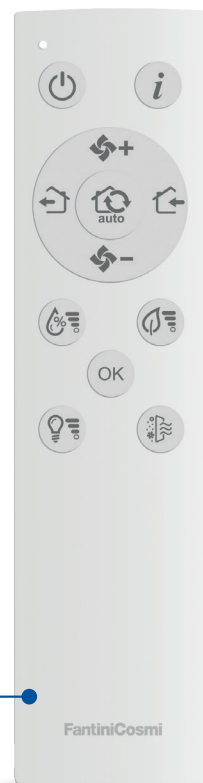

ECOCOMFORT PLUS, the updated ventilation heat recovery unit, **has been implemented with a new infrared remote control and new features**, to get a more intuitive and easy-to-use device.

A ventilation solution that **ensures a constant indoor air renewal** without opening the windows, **preventing the formation of moisture and mold**, also recovering the exhaust heat, while **saving the energy cost**.

The IR remote control allows a **simple and immediate use** by the end user. A multi-zone system is feasible with the installation of more ECOCOMFORT PLUS, using a single IR remote control.

IR REMOTE CONTROL

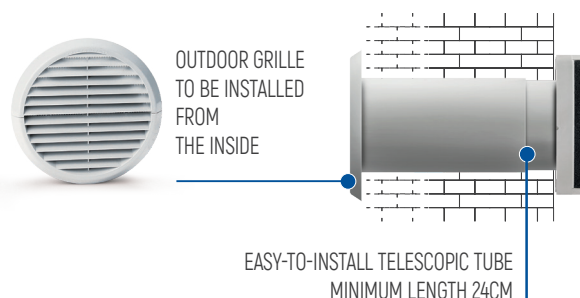

EASIER TO USE

ECOCOMFORT PLUS ensures the best comfort thanks to the built-in multiple sensors, such as VOC (Volatile Organic Compounds), temperature, brightness and humidity, **allowing the unit to adopt the most suitable ventilation mode automatically**.

Both the end-user and the installer can choose the desired comfort thresholds, while **looking at the current functions on the device frontal coloured LED**.

EASIER TO INSTALL

ECOCOMFORT PLUS is available in 2 diameters (100mm and 160mm) and has **to be installed on the perimeter wall**, without additional accessories or further settings.

TECHNICAL SPECIFICATIONS

Product code	AP19989	AP19993
Model	ECOCOMFORT PLUS 100	ECOCOMFORT PLUS 160
Ø Pipe	100 mm	160 mm
Power supply	110V ÷ 230V- 50/60Hz	110V ÷ 230V- 50/60Hz
